TPI to resell GSW Telnet Server for Windows and SSH Server For Windows

Last month Georgia SoftWorks (GSW) welcomed TPI to its ever growing network of global resellers for the GSW Telnet Server for Windows. From Healthcare to Manufacturing TPI has the expertise necessary to analyze a process and provide a turnkey solution, or specific components of a solution, based on the desires of each client. Headquartered in Columbus Ohio, TPI has additional branches located in Dayton OH, Louisville KY and Irvine CA.

Georgia SoftWorks, maker of the GSW Telnet Server for Windows (TelnetD Windows) and SSH Server for Windows (SSHD Windows), is pleased to introduce a new reseller in the USA.

TPI delivers Wireless, Barcode, RFID and Data Center Solutions to a variety of industries including wholesale distribution, manufacturing, healthcare, and retail/consumer goods. TPI provides customers with the most efficient and cost effective solutions to their wireless, bar-coding, mobile computing and data center environments. TPI's focus is on a meaningful ROI, unparalleled technical support and first-rate service with every customer engagement.

The GSW TelnetD is excellent when using mobile devices, RF terminals, Bar Code scanners and other data collection devices in wireless environments. "Telnet, (sometimes called TelnetD) is the best solution for these applications because Telnet is a character oriented and optimized protocol", said Doug Hitchcock of GSW, "...the data being transmitted between RF Terminals and Windows server is almost entirely character, so it is really an optimal solution". With the GSW Telnet Server (TelnetD Windows), the RF wireless hand held application developer is able to create more generalized applications that will easily work with a variety of manufactures' hardware making it an excellent complement to the solutions offered by TPI. Not only is there a development and maintenance cost savings, this added flexibility allows customers to utilize existing hardware in heterogeneous environments.

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions.
