

## GSW Telnet Server for Windows Expands Resellers to Vietnam

Georgia SoftWorks (GSW) announces the addition of Vietnamese reseller BSD Solutions for GSW [Telnet Server for Windows](#) and SSH Server for Windows to its ever growing network of global resellers.

Dawsonville, GA (PRWEB) March 30, 2012

Georgia SoftWorks, maker of the GSW [Telnet Server for Windows](#) and SSH Server for Windows is pleased to have BSD Solutions as a new reseller. BSD Solutions is located in Ho Chi Minh City, the largest city in Vietnam and offers administration solutions for production, retail, and health care industries. With a primary focus on ERP and integration solutions for businesses and warehouse management, BSD focuses on solutions to enhance client relationships, sales, product and operations management, and inventory optimization.

"Since 1999 GSW has had customers in Vietnam from Hanoi to Ho Chi Minh City. We are excited that we now have an official reseller of the GSW Telnet Server and [SSH Server for Windows](#) based in Vietnam," said Diane Sexton of Georgia SoftWorks. "Vietnam is recognized as a rapidly emerging market and local presence is significant."

The GSW Telnet Server is excellent with mobile devices, RF terminals, Bar Code scanners and other data collection devices in wireless environments. The GSW SSH Server is a natural solution when using stationary or mobile devices or barcode scanners. The RF wireless hand held application developer is able to create more generalized applications that will easily work with a variety of manufactures' hardware, making it an excellent complement to the solutions offered by BSD Solutions. Not only is there a development and maintenance cost savings, this added flexibility allows customers to utilize existing hardware in heterogeneous environments.

Established in 1991, [Georgia SoftWorks](#) is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with a Internet Information Server (IIS) like certificate to user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also support certificate trust lists (CTL)
