This month marks 5 years that Royal 4 Systems has been an authorized reseller of the Georgia SoftWorks (GSW) Telnet Server for Windows and SSH Server for Windows.

Based in Long Beach, California, Royal 4 Systems, Inc. is a global leader of supply chain management that has been providing technology-based logistics solutions including software services and hardware for multi-national operations since 1984. Their solutions increase the effectiveness and efficiencies of companies within and across the supply chain. Royal 4 Systems has hundreds of customers on six continents.

Royal 4 Systems uses the Georgia SoftWorks software in the Tires, Medical, Food and Beverage, 3PL and Apparel industries.

"The GSW solutions fit great into the solutions we provide," said Kim Gregory Emond of Royal 4 Systems. "We use it for the RF terminal emulation."

Royal 4 Systems states that they chose GSW for their solutions based on the price and ease of use. They say that the GSW software is easy to configure, which makes it stand out among other software.

"Georgia SoftWorks has been a good partner and the software works great," said Emond.

Georgia SoftWorks is a privately held software development company who has received global recognition for the development of the GSW Telnet Server for Windows and SSH Server for Windows. They have end users and resellers all over the world.

"Every reseller that reaches a partnership milestone with us adds another layer of reputability and trust to the GSW solutions. These partnerships create a win-win for both companies," said Doug Hitchcock of GSW. "We enjoy working with Royal 4 Systems and look forward to celebrating future milestones with them."

About Georgia SoftWorks:

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with a Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
