The broad spectrum of industries that use the GSW Software has led to their continually growing number of resellers and end users all over the world.

The GSW Telnet Server for Windows is excellent with mobile devices in RFID, RF Terminal, Barcode scanners and other data collection and wireless environments, making it a great match for the industries that BCIL services and the solutions they provide. BCIL works in retail, transportation and logistics, pharmaceuticals and healthcare, manufacturing and services and government industries.

"Bar Code India knows their market and is a well-respected company. They will be a great asset to our reseller network," said Doug Hitchcock of Georgia SoftWorks.

About Georgia SoftWorks:

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
