Georgia SoftWorks (GSW) announced today that they will significantly increase their investment in creating videos for their products such as the Telnet Server for Windows, [SSH Server for Windows](#), and Business Tunnel. The videos will be available via their website and [YouTube channel](#). The videos will feature tutorials, product overviews, promos and other material to make GSW accessible from a variety of mediums.

"Many people would much rather watch a short video than read a three page detailed description of a product," said Rebecca Sexton of [Georgia SoftWorks](#). "We want to provide a variety of outlets for people to receive product information and customer support. Instead of just telling customers how to accomplish a task, we want to also be able to show them."

Recently published videos include product overviews for the GSW Business Tunnel, tutorials on how to install and register products and step-by-step guides on how to setup different GSW Business Tunnel scenarios.

The Georgia SoftWorks YouTube channel, called [GeorgiaSoftWorks](#), will be updated regularly and supplemented with links from GSW's website, Twitter, Facebook, blog and other social media outlets.

GSW's first commitment is to provide videos for their latest product, the GSW Business Tunnel, an easily configured SSH Tunnel that provides businesses secure access to required network services that are often risky due to non-secure locations or unavailable due to policy configurations.

"We have a list of videos that we want to get distributed for the GSW Business Tunnel. After that is done, we will publish videos to supplement our other products," said Sexton.

Georgia SoftWorks is a software development company based in Dawsonville, GA, USA that has received global recognition for their development of the GSW Telnet Server for Windows and the GSW SSH Server for Windows. They have end users and resellers all over the world. The GSW software is used in a variety of industries, including automobile manufactures, airlines, bottling plants, grocery stores, food warehouses, educational institutions and more.

About [Georgia SoftWorks](#):

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows.

GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
