Since 2004, Majure Data has been a Georgia SoftWorks partner and authorized reseller of the GSW Telnet Server for Windows and SSH Server for Windows. Located in Milton, Georgia, Majure Data helps companies achieve their Warehouse Management System (WMS) goals and maintains an excellent success rate in implementing software solutions.

"Majure Data is a great asset to our reseller team. They have years of experience and an excellent reputation in the world of warehouse management. We are excited to celebrate this milestone and look forward to more years of partnership with them in the future," said Doug Hitchcock of Georgia SoftWorks.

Founded in 1982, Majure Data is known as a leading supplier of Warehouse Management Systems across many industries. Majure Data combines their expertise in discovering what it takes for successful WMS implementation with their WMS product and implementation methodology. Majure Data uses the GSW Software in the warehousing and distribution industry, specializing in the building products industry.

"GSW provides us a stable telnet server for ruggedized mobile computers to interact with RF Navigator WMS," said Stephen Critchfield of Majure Data. "GSW software has been stable at our installations. GSW support is able to help us when there are any issues that arise."

Georgia SoftWorks is a software development company who has received global recognition for their Telnet Server for Windows and SSH Server for Windows. GSW has end users and resellers all over the world and are used in a countless number of industries. The Georgia SoftWorks' Telnet Server for Windows, SSH Server for Windows and Client applications are industrial quality software designed for superior operation in demanding environments, making it an excellent match for the solutions that Majure Data provides.

About Georgia Softworks:
Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with Internet Information Server (IIS) like certificate to user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also support certificate trust lists (CTL).
