Georgia SoftWorks (GSW) announces China's Hentor Technology, Ltd. as a reseller for the GSW Telnet Server for Windows and SSH Server for Windows. Hentor Technology is a total IT solution supplier focusing on the Supply Chain Industry.

Hentor Technology, Ltd. (Hentor) provides services like IT architecture consulting, application development, implementing and training and E-commerce. As a certified partner of HighJump, Inc., Hentor has a multitude of customers in China such as the China Network Supply Chain Service Co, Ltd and Maesk Inc. Hentor has offices in Shanghai and Hong Kong.

"We picked GSW to use in our solutions because it is capable of very complex telnet interactions and it is easy to use," said Eric Zou of Hentor.

Hentor will be reselling GSW software exclusively with HighJump solutions. HighJump Software is a global provider of a full suite of supply chain management software that streamlines the flow of inventory and information from supplier to store shelf.

Georgia SoftWorks is a software development company that is best known for its development of the GSW Telnet Server for Windows and SSH Server for Windows. Based in Dawsonville, GA, USA, GSW has received global recognition for their software and have resellers and end users all over the world. The GSW software is used in a variety of industries, including automobile manufacturers, airlines, bottling plants, educational institutions, food warehouses, grocery stores and more.

The Georgia SoftWorks software will fit into the solutions that Hentor offers by providing connectivity between the RF scanners and the Windows servers. Hentor will be using GSW software in industries such as 3PL, Retail, E-commerce and more.

About Georgia SoftWorks:
Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server.
