Since April 2005, ASCO has been an authorized reseller of the GSW [Telnet Server for Windows](#) and SSH Server for Windows. Located in Poland, ASCO is a software solutions provider for computer-aided companies in management. They also provide integration services and online order systems.

"We use GSW products to deliver easy and reliable online connections in multidivisional companies," said ASCO of their relationship with GSW, "[The GSW Telnet Server] is a modern system for client-to-server, acting on the basis of encrypted connections. It's main advantages are high reliability, advanced mechanisms to detect the loss of connection, support mouse functions and the ALT key, printing services on the client side, and many more."

Founded in 1994, [ASCO](#) creates and develops software programs for companies to increase efficiency and assist with overall management. ASCO focuses on the development of systems to support automotive shops, warehouses and garages, making it a perfect match for the Georgia SoftWorks products.

Georgia SoftWorks is a software development company that develops industrial quality software designed for the most rigorous commercial environments. GSW has gained its worldwide recognition from the development of the GSW Telnet Server for Windows and [SSH Server for Windows](#). They have end users and resellers on every continent (except Antarctica) and are in a variety of industries, including automotive, warehousing, airlines, schools, governments, food and beverage and more.

"Every reseller milestone is important to us. Our resellers play a huge role in the distribution of our software," said Doug Hitchcock of GSW. "We really appreciate our partnership with ASCO. They know their market well and are a great asset to our reseller network. We look forward to more years of partnership with them in the future."

About [Georgia SoftWorks](#):

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows.

GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
