UCS Solutions is now an authorized reseller of the Georgia SoftWorks Telnet Server for Windows and SSH Server for Windows. Located in South Africa, UCS Solutions is a premier provider of systems and business process services to companies that operate within the Retail Value Chain.

Founded in 1997, UCS Solutions focuses on the provision of SAP related services to large and medium enterprise retailers. They are a SAP Gold Partner and have SAP Recognized Expertise in Retail certification. They currently support customers in South Africa, Middle East, Europe and Canada.

"UCS is a great addition to our reseller network," said Doug Hitchcock of Georgia SoftWorks. "They specialize in SAP, which is an excellent match with the GSW products. GSW products work great with SAP out of the box."

The Georgia SoftWorks UTS (Telnet Server for Windows and SSH Server for Windows) allows ease of operation in SAP environments. The GSW products offer several SAP specialized features. For example, users can use the GSW Logon Scripts to automatically launch SAPConsole when the UTS session is connected. SAP users can also utilize the GSW UTS to make printing to tethered printers from ECC possible.

Georgia SoftWorks is a software development company who has gained worldwide recognition for their development of the GSW Telnet Server for Windows and SSH Server for Windows. Their industrial quality software is used in a wide variety of industries and remains unmatched in today's commercial applications in terms of reliability, consistency, performance and features. GSW has resellers and end users on every continent (except Antartica).

About Georgia SoftWorks:
Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
