

Always use the matching version of the Georgia SoftWorks Telnet Client with the Georgia SoftWorks Telnet Server

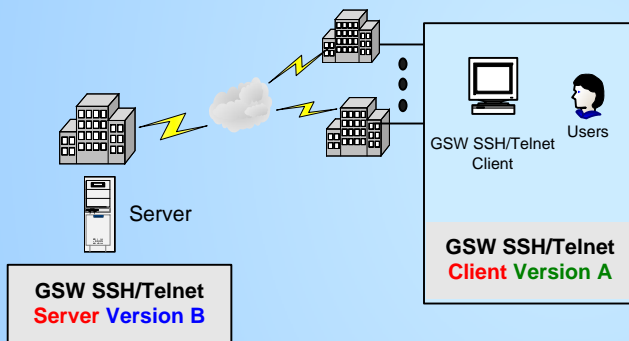

Feature: Automatic Update of the GSW SSH/Telnet Clients

1 Current version of the GSW SSH/Telnet Server and GSW SSH/Telnet Client is installed throughout your enterprise.

2 Georgia SoftWorks releases a new version of the GSW SSH/Telnet Server and Client with powerful features!

3 System Administrator Installs New Version on Server

At this point the GSW Clients are not the same version as the GSW SSH/Telnet Server.

4

The next time a client connects to the GSW SSH/Telnet Server:

1. The GSW SSH/Telnet Server recognizes that the Client Version is different than the SSH/Telnet Server Version.
2. The GSW Client is automatically upgraded on the Client Computer and the session is restarted with the matching GSW Telnet Client.
