

## Peak-Ryzex, Inc. to Resell GSW Telnet Server for Windows and SSH Server for Windows

Georgia SoftWorks (GSW) welcomes Peak- Ryzex, a systems integrator of supply chain automation and inventory management solutions and services, to its ever growing network of global resellers for the GSW [Telnet Server for Windows](#). Peak-Ryzex delivers a tangible return on investment to some of the world's largest corporations.

Dawsonville, GA (PRWEB) April 26, 2013

Georgia SoftWorks, maker of the GSW [Telnet Server for Windows](#) (Telnetd Windows) and SSH Server for Windows, is pleased to introduce a new reseller. Headquartered in Columbia, Maryland Peak-Ryzex has several locations in the US as well as offices in Canada and the UK.

Peak-Ryzex's portfolio of solutions and services includes business process consulting, SAP systems integration, RFID, wireless professional services, project management, printing/media solutions, and equipment repair and support services. These solutions allow businesses to collect and act on information about their manufacturing, warehousing and distribution operations as it relates to the supply chain. Extensive expertise and the ability to deliver turnkey solutions as a single point of accountability distinguish Peak-Ryzex.

"The Georgia SoftWorks industrial quality software is designed for superior operation in demanding mobile RF Terminal environments making it a good match for the industries served by Peak-Ryzex which include manufacturing, warehousing, distribution, retail, consumer goods, high-tech/electronics, industrial equipment, automotive industries and more," said Diane Sexton of Georgia SoftWorks. With the GSW Telnet Server (Telnetd Windows), the RF wireless hand held application developer is able to create more generalized applications that will easily work with a variety of manufacturers' hardware making it an excellent complement to the solutions offered by Peak-Ryzex. Not only is there a development and maintenance cost savings, this added flexibility allows customers to utilize existing hardware in heterogeneous environments.

Established in 1991, [Georgia SoftWorks](#) is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with a Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).
