

GSW Telnet Server Subscription Plans

- Access to **Free** version upgrades - at *your* convenience.
- Session Upgrades for the incremental cost.
- Renewable at the end of the duration.
- Reduced Administrative Time.
- Priority Technical Support.

At Georgia SoftWorks we are committed to providing the very best Windows NT/2000/XP Telnet Server on the market! Our continuous improvement includes pioneering new features, listening to customer feedback and expanding the capabilities of the Georgia SoftWorks Telnet Server.

Due to our development and release generation methods and JIT User Manual production we can release software on a much more frequent basis than other organizations. As soon as the features or defect resolutions are Alpha and Beta tested we can generate a release. This provides our customers with features much quicker than the “grouping” method used by other companies.

GSW Telnet Server Subscriptions:

- Super Value for the money! If you upgrade just once in 3 years your investment has paid off.
- Reduce Administrative time to keep your software up to date. Don't spend your time getting purchase approvals every year.
- Resellers: Ensure your customers software have current software for three years allowing them free access to the latest features and priority technical support.
