

**Feature: Broadcast a Text Message**

Broadcast a text message to one or more active telnet sessions.

*From the convenience of your office, send a broadcast text message to one or more active telnet sessions.*

**Save Time!**

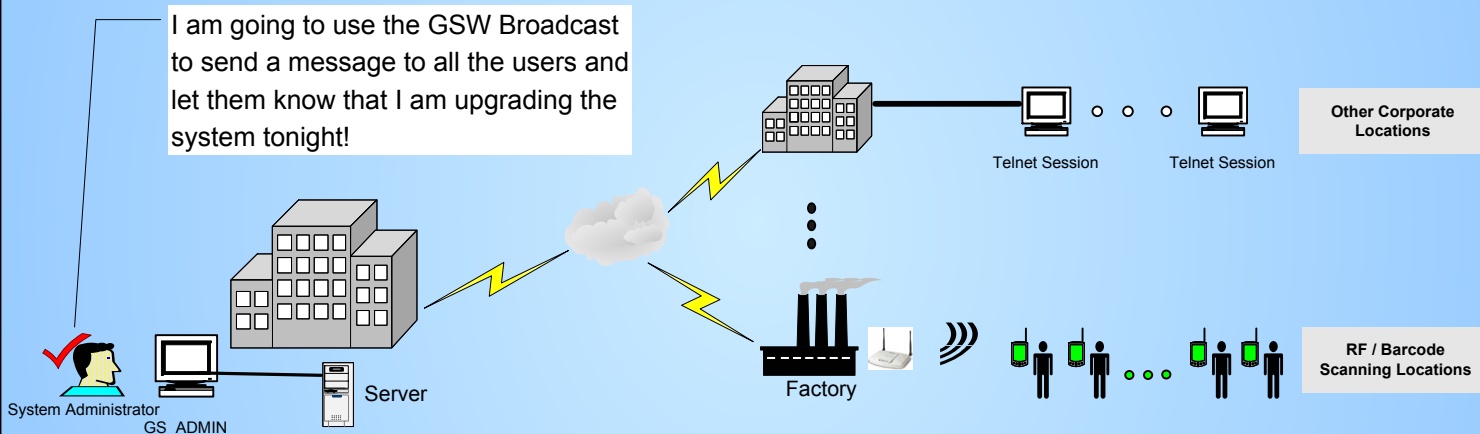

No need to visit or call each location to communicate a message to the users.

**Dependable Delivery!**

Each user will see the message.  
 Message stays on the display until acknowledged.

**Easy to Use Interface**

Available via the familiar and easy to use  
 GS\_Admin Session Administrator interface.

**Broadcast command line utility is also provided**

Use your favorite scheduler to plan broadcast messages in advance!

Broadcast filter capabilities:

- All Active Sessions
- Specific User IDs
- Specific IP Address

★ **Does Not Corrupt Client Data!** ★  
 Application screen is completely intact after message is acknowledged!

**Authorized user can broadcast from any telnet session or the command shell on the server.**
