Georgia SoftWorks FIPS 140-2 compliant option for the GSW SSH2 Server

GSW provides a Federal Information Processing Standards Publication (FIPS) 140-2 compliant option for those entities with requirements to meet cryptographic module security standards to protect sensitive and valuable data. FIPS standards are either mandated or recommended for use in federal government information technology (IT) systems.

Georgia SoftWorks undertook a purposed and specific development effort in order to provide required FIPS 140-2 compliant SSH2 server and client (mobile and desktop) software to the United States Military. Having completed this task, GSW is able to make this software available to other branches of the Federal government as well as State governments and other institutions including research, educational and commercial.

GSW Mobile Client FIPS 140-2 Configuration

GSW SSH2 Server Session Administrator

Easy Configuration

Configuring the FIPS 140-2 option on GSW Mobile Clients is easy and the SSH2 Server FIPS 140-2 compliant configuration option is enabled when registered.

Confirm Compliancy

Using the UTS Session Administrator you can verify True GSW FIPS 140-2 compliant connections. An asterisk "*" will be pre-pended to the user name for connections that are FIPS 140-2 compliant for both the client and the server¹.

Call for GSW FIPS Option Pricing!

¹ This means that the GSW SSH2 client selected the "FIPS SSH2" configuration option and the SSH2 Server is verified as FIPS 140-2 compliant. See User Manual for details on requirements for FIPS 140-2 compliance.
