

GSW Team Services is about unprecedented user collaboration and allows mobile device users to quickly share resources to improve productivity and reduce hardware costs

## EMPOWERS MOBILE DEVICE USERS

### Team Services

### TEAM MEMBERS HELPING TEAM MEMBERS

- **Transfer** - move a session from one device to a different device
- **Share** - two devices SHARE a single session.
- **Swap** - swap devices with a team member but keep your original session
- **Recover** - recover a session that was disconnected from a device (to another device)

### TRANSFER

**Transfer your session to another device.**

GSW Team Services *Transfer* allows the session that is transferred to second device to resume at the exact point where the session was on the first device

All Team Services performed from the device  
**No System Administrator Intervention required**

### SHARE

**Two devices share a single session.**

- Use either device for input into the session.
- Output from the session is displayed on both devices.

Shadow, monitor, use for quality control, remote assistance, etc.  
A Team member with a forklift can use a mobile scanner with his truck mount device.

You do not even have to log off when using Team Services

### SWAP

**Swap sessions with another Team Member.**

Takes two sessions on two devices and moves the session on the 1<sup>st</sup> device to the 2<sup>nd</sup> device and moves the session on the 2<sup>nd</sup> device to the 1<sup>st</sup> device. Each session is preserved and will resume exactly where it was when the swap occurred.

Empower you users with innovative session management tools that are initiated from the client!

### RECOVER

**Recover a session that was disconnected from a device.**

The same device or a different device can be used to recover the session. A session can be disconnected for a variety of reasons such as:

- Device damaged (ran over by forklift)
- Batteries running out on device, Device powered off.
- Device out of range of access point
- Network failure (router, hub, switch, etc.), etc.

GSW Team Services *Recover* allows the session to be recovered at the exact point where the session was disconnected. Work in progress can be resumed as normal.

All Team Services easily performed in **under 60 Seconds**
